Hilton Garden Inn, Salina, KS

Kansas Premier Recycling, Composting & Waste Reduction Conference & Exhibition

Kansas Department of Health and Environment - Bureau of Waste Management

1000 SW Jackson, Suite 320

Topeka, KS 66612-1366

785-296-1600 www.kdhe.ks.gov/168/Waste

Mission: To minimize the health and environmental impact associated with the generation, storage, transportation, treatment, and disposal of all solid and hazardous wastes in Kansas.

Kansas Organization of Recyclers

PO Box 3902

Topeka, KS 66604

785-233-3771 www.kskor.org

Mission: The Kansas Organization of Recyclers is a non-profit, membership based network of representatives from government, industry, non-profit and public entities and individuals that support environmental stewardship through waste reduction, composting, reuse, recycling, and sustainable efforts in Kansas. KOR provides advocacy, information, technical support, networking and educational opportunities in partnership with local, state, regional and national organizations.

Welcome to the 2024 Kansas Waste Reduction Conference

As I write this, I am preparing for my retirement on March 15. I will miss joining you at the Kansas Waste Reduction Conference. Over the years I have been impressed and inspired by your collective knowledge, dedication, and enthusiasm for everything “waste reduction”. As the importance of waste reduction gains more national attention, I hope this Conference provides you with ideas and resources to sustain and grow your local programs.

This Conference started in 1994 as the Composting Works Conference but was eventually shortened to WORKS! to attract professionals engaged in recycling and other waste reduction practices. This year the planning committee adopted a new Conference title, the Kansas Waste Reduction Conference, with the intention of attracting an even broader audience. Please thank the planning committee for their thoughtful planning of this event that brings you all together to share your industry knowledge and experience.

In 2023 the Kansas Department of Health and Environment was awarded a Solid Waste Infrastructure For Recycling, or SWIFR, grant by the U.S. Environmental Protection Agency. This grant will be used for development of a Kansas Sustainable Materials Management Plan that has a focus on strategies for waste reduction. During 2024 the grant will fund three municipal solid waste landfill waste characterization studies to generate data on the types and amounts of recyclable materials currently being disposed in landfills and inform the development of waste reduction strategies. The BWM will be soliciting stakeholder involvement throughout this process. We look forward to your participation in the development of this Plan.

I hope you leave the Conference inspired and re-energized, and wish you the best in your future endeavors. For my part, I will continue recycling and hope to start a backyard composting operation!

A handwritten signature in black ink that reads "Julie Coleman".

Julie Coleman
Director, Bureau of Waste Management

Welcome to the KWRC 2024 Conference and Exhibition

We are glad you are here and look forward to an exciting and informative few days. Please take advantage of all there is to see and do at the Conference and in Salina.

We hope you are ready to have honest conversations while you are here about the future of recycling, composting and waste reduction programs in Kansas. Our programs face many challenges in the days and years to come. We will only solve these problems if we work together and have open conversations about what steps we must take.

One important goal for the Kansas Organization of Recyclers is that you leave the Kansas Waste Reduction Conference with knowledge you can use to strengthen and support your program back home. KOR's primary goal is to help programs survive and ensure recycling, composting and waste reduction programs across Kansas are getting the support they need from elected officials and citizens in their communities.

Enjoy the sessions and spend time speaking with your colleagues. Make sure before you leave, or soon after, you reach out to KOR to let us know how we can help recycling and waste reduction programs in Kansas.

The KOR Board of Directors

Speaker Biographies

Sally Beyers, Development Director, Lakemary Center

Sally Beyers has worked with Lakemary Center for nearly 10 years. In her role as Development Director, she has been instrumental in launching numerous programs at the non-profit organization, including the creation of Lakemary Therapeutic Ranch in 2015. With the support and partnership with KDHE and the Lake Region Solid Waste Authority, Lakemary has recently expanded the ranch's composting programs. With an ambition goal of processing all of the compostable materials from the school's cafeteria in the coming years, Lakemary is combining fun and creative classroom instruction with real life science lessons. All while also enjoying the many benefits of gardening and outdoor recreation!

Sally lives in Overland Park, KS with her husband. She graduated from Baylor University in Waco, TX where she met her husband of 30 years. They have three adult children who are thriving in their own lives as Texans!

Kimberly Butler, BWM Grant Coordinator

Kimberly is the new Grant Coordinator at KDHE's Bureau of Waste Management. She has been with the bureau since, September 2023. Kimberly has 15 years of grant experience while working for a large nonprofit in California. She is thrilled to be back in her home state with family and friends as she grew up in a rural area near Lecompton, Kansas. She is currently managing grants for programs like the Waste Tire Grant and is eager to dive into the Solid Waste Grants Program which is currently open for applicants. She is very excited about this new chapter and is dedicated to helping organizations in Kansas secure vital funding for environmental initiatives.

Ashton Conner, Centennial Recycling Broker

Ashton has worked at Centennial Recycling for 7 years as a broker. At Centennial Recycling she buys and sells recyclable commodities in truckload quantities. She has developed strong partnerships across the US to ensure mill groups have high quality material for their mills and to maintain movement and competitive pricing for her suppliers. She is a mom to 3 little kids so if you call her there may be a little toddler voice in the background.

Linda Craghead, Director of Facility Services, KS State University

Linda Craghead, an alumnus of Kansas State University, joined the Facilities team in 2019. Currently serving as the Director of Facility Services, Linda provides leadership to Custodial Services, Landscape Services and Refuse & Recycling Services.

After her multi-state career with the ag industry giant, Cargill, Inc., Linda returned to her home state where she focused her efforts on economic development of the Flint Hills Region of Kansas. Selected to serve as the Assistant Secretary of Kansas Department of Wildlife, Parks and Tourism in 2011 and as interim agency Secretary in 2018, her passion for people, travel, nature, outdoor adventure and her home state served as the catalyst

for innovative community partnerships and ongoing economic growth. A proud mother of three sons, Linda and her husband, Galen live in the Flint Hills of Kansas, near Alma.

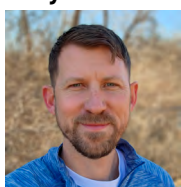

Michelle DeHaven, Program Manager, Environmental Finance Center, Wichita State University

Michelle works with public and nonprofit organizations and initiatives to enhance their capacity to face environmental, social, and economic challenges. She has experience in extensive research, survey design and development, both quantitative and qualitative data analysis, facilitation, community outreach and education, and professional training and development. Michelle's project and research focuses are on solid waste management, including food loss and waste and recycling, water and wastewater utility management and planning, and environmental equity issues, such as access to clean, safe water and environmental health programs. Michelle graduated with a Master of Public Administration and a Bachelor of Arts in Sociology from

Wichita State University.

Clayton Duffin, Assistant Solid Waste Manager, City of Olathe

Clayton Duffin. City of Olathe, Assistant Solid Waste Manager. 20 years in the City of Olathe Solid Waste Department, most of which working directly with Olathe's composting operation.

Doug Ferguson, EPA

Doug Ferguson has been cleaning up hazardous waste sites as an On-Scene Coordinator for US EPA for the last 21 years. Doug's career started as a high school chemistry and physics teacher, and he still enjoys learning and working with others in support of keeping our communities safe. Notable site cleanups include 2,070 lbs homemade fireworks precursor site, radio-pharmaceutical lab, residential lead cleanups, mercury cleanups, plating shops as well as numerous abandoned containers. Emergency responses to hurricanes, typhoons, tornadoes, train derailments, wildfires and most recently, TC Energy Pipeline Cleanup in winter 2022-23 as well as Household hazardous Waste cleanup after the Maui Wildfires.

Also, at EPA, he has taught numerous classes on chemical identification, drug and homemade explosive labs. Prior to this, he spent 4 years providing technical support to EPA as an environmental consultant including sampling at the Capitol Hill Anthrax. In 1988, Doug completed his bachelor's degree in Chemistry from Graceland University in Lamoni, IA where he also received his Chemistry teaching endorsement for secondary school. In 1999, Doug completed his Master of Science degree in Environmental Science from the University of Kansas in Lawrence, KS.

Shay Hanyak, Regional Coordinator, Lake Region Solid Waste Authority

Shay Hanyak is the Regional Coordinator for the Lake Region Solid Waste Authority, which is comprised of six East-central Kansas counties (Anderson, Coffee, Franklin, Linn, Miami and Osage). Her responsibilities include advocating for proper solid waste management and landfill diversion, plus promoting recycling and Household Hazardous Waste programs. She also provides presentations for schools, grant writing assistance, and sustainability recognition efforts and award at county fairs and special events. Shay is a graduate of the University of Waterloo in Canada, with a B.S. Degree in Geological Engineering. She started her career in environment consulting and then branched out to include Environmental, Health and Safety compliance.

Morgan Henderson, Metro Manager, Ripple Glass

Morgan Henderson is the Senior Marketing and Communications Manager for Ripple Glass. She cultivates strong community relationships and leads local marketing efforts, including the management of all social media accounts. Morgan also coordinates and executes educational opportunities and community outreach engagements, while promoting the Ripple Glass collection programs across Kansas City, St. Louis, and Atlanta. Morgan has served as President of the Kansas Organization of Recyclers for the past two years and has enjoyed fostering new and existing relationships across her home state of Kansas.

Lindsay Holmes, Program Director, Barton Community College

Lindsay has been a Barton Community College faculty member providing Household Hazardous Waste training since 2008. She currently serves as the Program Director for the Hazardous Materials Management and Emergency Management/Homeland Security programs. Lindsay holds a Bachelor's of Science in Occupational Safety and Health from Columbia Southern University and an Associates of Applied Science in Fire Science from Hutchinson Community College.

Sheila Kjellberg, Coordinator, KS Wesleyan University

Sheila Kjellberg, Coordinator for the Community Resilience Hub at Kansas Wesleyan University. Witnessing the challenges faced by my community sparked a passion for creating positive change.

As the Community Needs Specialist for the Saline County Food Action Community Team and a 2024 Wallace Center Community Food Systems Mentorship Program mentee, I'm firmly committed to ensuring everyone has access to healthy food. I believe food is a universal right, and I'm actively involved in initiatives that promote a more sustainable and equitable food system in Salina.

At KWU, I'm helping make the campus more sustainable, fostering a culture that prioritizes environmental responsibility. Outside of work, I enjoy the company of my family and the therapeutic practice of tending to my unique backyard garden.

Garrett Lloyd, Patrol Officer, RCPD Emergency Response Unit, Hazardous Evidence Response Team

Ofc. Garrett Lloyd began his law enforcement career with the Riley County Police Department in 2014 where he served as a patrol officer. In 2017 Ofc. Lloyd attended advanced training which allowed him to specialize in crime scene investigative techniques. In 2019, while assigned to RCPD's Special Investigative Unit, Ofc. Lloyd was an integral part of "Operation Chicago Connection" which resulted in the disruption of the largest heroin dealing network in the midwest and the federal prosecution of over fifty subjects. In 2021, Ofc. Lloyd was selected to join RCPD's Emergency Response Unit as a member of the Hazardous Evidence Response Team.

Ofc. Lloyd is a nationally accredited Hazardous Materials Technician and holds additional national certifications in the handling and collection of chemical, biological, radiological, and nuclear materials. Ofc. Lloyd holds a B.S. in Criminal Justice from Fort Hays State University.

Brandon Meyers, Sr. Territory Manager

Brandon joined Rehrig Pacific in 2017 in the role of Environmental Sales Representative working closely with current and prospective customers to understand their business needs. Through Rehrig's extensive solution portfolio of roll out carts, commercial containers, in-field services, and Vision technology he has successfully managed over 70+ projects delivering value that impacts his customers' bottom line. 7+ years solid waste industry & 6 years heavy industrial water treatment sales experience
Bachelor of Science, Business Management- Purdue University Northwest
Associates Degree- Entrepreneurship- Purdue University Northwest

Dennis Monseteir, National Sales Manager

Dennis joined Rehrig Pacific in 2012 in the role of Canadian Sales Manager, to assist in the development of the value-added services that Rehrig Pacific provides. He works with municipalities and private haulers on a wide array of programs including supply and delivery of carts, cart maintenance, RFID integration, container retrofits and the on-going development of custom Vision software, which is used to track assets, manage work orders, and track collections using RFID technology. To date he has implemented more than 40 large scale roll outs and over 3.6 million carts. 11+ years Rehrig experience, 10+ years solid waste industry sales experience, Bachelor of Arts, Business and Society - York University, and Certificate, Professional Sales - University of Toronto Mississauga

Nathan Morray, Kansas Trophy Outfitters

Nathan Morray works for Kansas Trophy Outfitters, lives in Gridley with his wife and 3 children.

Kara Pochiro, Vice President of Communications & Public Affairs, Association of Plastic Recyclers (APR)

As Vice President of Communications & Public Affairs for the Association of Plastic Recyclers (APR), Kara Pochiro manages the implementation and promotion of technical, educational, market development, legislative efforts, and programs. She is responsible for the overall management of APR internal and external communications, as well as media relations. Kara joined the plastics recycling industry in 2010, gaining experience through a variety of roles. A graduate of Ohio University, she holds a Master's Degree from Columbia College in South Carolina. She resides in Anderson, SC.

Kim Qualls, Education and Communication Director, Kansas Association of Counties (KAC)

Kimberly K. Qualls is the Kansas Association of Counties (KAC) Education and Communications Director. Kimberly joined KAC on February 17, 2020, as KAC's Education and Communications Manager and was promoted to Director in late 2021.

Kimberly joined KAC after serving as the Education Coordinator at KAMMCO in Topeka, Kansas. She has over 15 years of experience working in state government, including her tenure from 2007-2017 as the Kansas Department of Transportation Public Affairs Manager for the Northeast Kansas region.

"I look forward to providing our county members with quality educational programming to assist them in serving their residents," shared Kimberly. "One of my top priorities is to share the success stories of how KAC and our county members help to positively benefit the citizens of Kansas."

Karen Ramsey, Food Cycle KC

With a life-long interest in sustainability and environmental issues, Karen is a LEED Green Associate and holds a degree in Biological Ethics from Colorado State University. Over the years she has spent time involved in various environmental activities, including serving as a recycling center site manager for Bridging the Gap, volunteer field work with local community gardens, and leadership volunteer with Climate Action KC. After an extended career as a strategic development leader in healthcare IT, Karen co-founded Food Cycle KC with her husband in 2019.

At Food Cycle KC, she leads a dedicated and enthusiastic staff working to reduce residential and commercial food waste through organic waste collection services. On their farm in Eudora, KS they recycle this food waste into high-quality compost that they provide back to local community gardens and urban farms to facilitate local agriculture.

Honoring her family's farming history, supporting local agriculture, and helping the Kansas side of the Kansas City metro area enhance its climate resilience is her passion project.

Michael Rea, Project Manager, Center for Sustainability

Michael Rea has been with Johnson County Community College for 21 years, 14 of those years as the Project Manager in the Center for Sustainability. He began his work in sustainability setting up the comprehensive recycling, waste minimization and composting program that has seen a 60% waste diversion up from 14% in 2010. Since 2011 the college has been composting its own food waste on campus in excess of 430 tons. Michael's work lately has been focused on energy management and renewable energy. Since 2008 JCCC has avoided over \$10 million in electricity costs and has added 2.2mW of solar to building rooftops.

Matt Riggs, Outreach Coordinator, MARC Solid Waste Management District

Matt has worked in the environmental field for 28 years, 23 of them at Mid-America Regional Council (MARC). He coordinates regional recycling education initiatives such as RecycleSpot.org, the Recycle More At Work partnership, and the recycling hotline. He also oversees the regional Food Loss and Waste Reduction project, the Kansas City Environmental Education Network, and the MARC Green Team. He has an alter ego, Eco Elvis, which he uses to "edutain" people about taking care of the environment.

Franklin Rosario, Regional Program Manager, Ripple Glass

Franklin Rosario is the Regional Program Manager for Ripple Glass. He helps Ripple partner and work with Midwest communities spanning 8 states and always looking to grow. Ripple works with the communities to set up proper glass storage facilities in the form of large-scale bunkers through both public and private grant opportunities and organize its transportation back to our processing facility in Kansas City. Franklin was an intern with Ripple in 2018 and recently made his way back to the wonderful world of recycling!

Jessica Ruiz, Grant Administrator, KDHE Bureau of Waste Management

Jessica has been with Bureau of Waste Management for five years. On top of overseeing the waste tire grant program, she is also responsible for managing the bureau's Keep It Clean Kansas outreach efforts. A campaign focused on promoting recycling, composting, and waste reduction activities for a cleaner, healthier state. Jessica graduated from Kansas State University in 2017 with a bachelor's in public relations and political science.

Stan Slaughter, Missouri Organic Recycling

Stan started his compost education career four years before the first Kansas Works conference in 1995. He's given workshop sessions at all but a few of the events ever since then. In 1997 he became Kansas' traveling recycling and compost educator, a contract he served for 17 years and 1,200 schools.

Over 30 years later he's still going, working as Director of Education and Outreach for Missouri Organic Recycling.

During his work at Missouri Organic, Stan has created the Food Too Good to Waste Science Unit which was purchased for all Kansas Schools in 2020 and has now reached over 10,000 Kansas Students with Composting and Food waste reduction lessons. He also started the Climate Friendly Yard Makeover, transforming three properties in the Kansas City area to sustainable landscapes. On May 11 this year he will present the third annual Compost Festival in Kansas City with an expected attendance of 600 people. His career has taken him all over North America, to several foreign countries and in 2016 to England for a speech at the invitation of HRH Prince Charles.

Bill Sutton, Director of Shawnee County Solid Waste

Bill Sutton is the Director of Shawnee County Solid Waste and has been in that position since August of 2019. He is responsible for directing the daily collection of refuse and recycling for over 48,000 residents within the county. Prior to that, Bill was the District Manager at Waste Management's Rolling Meadows Landfill in Topeka KS.

Renee Trenshaw, P.E., SCS Engineers

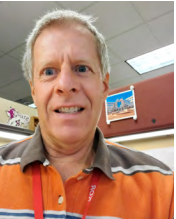

Renee is a licensed professional engineer who has happily been working with clients and solid waste management facilities for over 12 years. She attended the Missouri University of Science and Technology where she earned a B.S. degree in Civil Engineering. Since she joined SCS Engineers in 2011, she has had the privilege to work for long-standing clients in a range of projects including compliance support and permitting, design and construction, facility planning, and storm water management. She loves helping clients with planning and finding common sense ways to comply with regulations.

Jeff Walker, Section Chief, Compliance/Enforcement and Aid-to-Local, BWM

During my 25 years at KDHE I have worked for the Bureau of Consumer Health for 9 years in the Food, Drug, and Lodging Program and 16 years with the Bureau of Waste Management. I recently became the Section Chief for the Compliance, Assistance, and Enforcement and Aid to Local Units.

Emery Wiens, Environmental Specialist, BWM

Emery is an Environmental Specialist with the KDHE Bureau of Waste Management, overseeing composting and waste tire permitting, approving beneficial use – land applications, and assisting with livestock emergency disposal activities. He has a BS in Agricultural Engineering from Kansas State University, and a BA in Mathematics from Tabor College. Emery and his wife, Donna, have 3 kids and 8 grand kids. He gardens, composts, and plays tennis for fun, and entertains the grand kids.
